How did your writing improve during this project? What specifically do you feel more confident about?		
How would you evaluate your behavior? (Circle one)	I worked all the time. I worked most of the time. I worked half the time. I talked and played most of the time. I accomplished nothing or next to it.	
What grade do you feel you earned based on the amount of effort you applied and the level of improvement in your writing?	95	I took the project seriously and feel I improved significantly as a writer. I can see a definite improvement over my writing a month ago. I have a packed portfolio: I went beyond what Mr. Scott expected of me.
	87	I didn't always take the project seriously. Because I was off task frequently, I don't feel I improved as much as I could have. My writing is a little better than it was a month ago, but not a great deal. I have many things to show for the time I spent in class.
	79	I often wasted time because I didn't take the project seriously. As a result, my writing is no better than it was a month ago. I have several things to show for the time I spent in class.
	72	I spent more time playing than working. I'm not even sure if my writing improved because of the amount of time I spent doing other things. I have a few things to show for the time I spent in class.
	65	This was a waste of time for me. I took advantage of the fact that we were working independently to make almost every day a free day. I have little or nothing to show for the time I spent in class.
How would you justify the grade you have given yourself above?
